

MiniVID WiFi Camera

The MiniVID WiFi 5MP camera is an incredible new addition to our camera line. It can be mounted to nearly any brand or type of microscope with trinocular C-mount, or inserted into one eye-tube of a binocular head using the optional eyetube adapter. Connect to any iOS device (iPhone/iPad) or Android phone/tablet through the "Ucam" app. Additionally, the MiniVID WiFi can be utilized with the included software for all PCs. The MiniVID WiFi has many different applications, but is best suited for teaching, training, and educating clients, and students.

- **Take the microscope image** to the client, not the client to the microscope
- **Best of both:** High resolution *and* fast frame rates
- **Stream live images** to multiple devices at the same time
- **Built-in rechargeable batteries** for true wireless imaging

MINIVID WiFi

Image Sensor

1/2" color CMOS chip – 5MP

Frame Rate

Fast frame rates ensure smooth motion for fast moving specimens or live teaching. When connecting to PC using USB cable, maximum frame rates are:

- 640x480@40fps;
- 2592x1944@15fps

When using WiFi, maximum frame rates are:

- 640x840@30fps;
- 2592x1944@5fps

Image Capture Capabilities

Capture live-streaming video clips on any device

Capture high-res images in BMP, JPG, PNG formats

System Requirement

iOS6 or higher

Android 3.0 or higher

Microsoft XP/7/8/10 (32 & 64 bit)

Software

Download the free "Ucam" app

Includes CD with software for PC

Mounting Requirements

Standard trinoc c-mount (threaded)

or insert into eyetube with optional adapter
